DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on March 2, 2007 has been entered.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 64 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The phrase "dialkylmethyllammonium metasulfate; either quaternized tertiary amines," is garbled. Tertiary amines, if that is what is intended, are not cationic. "Metasulfate" appears incorrect. Applicant is reminded to refrain from adding new matter when correcting this.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 1751

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 50-58 and 61-65 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by WO 99/59955. The reference is in French. Reference is made to English language equivalent US 6,458,987. See Examples 6, 8 and 10.
6. Claims 50-53, 55-58 and 62-65 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Trani et al., US 5,702,636. See the example at col. 7.

Claim Rejections - 35 USC § 103

7. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
8. Claims 50-65 are rejected under 35 U.S.C. 103(a) as being unpatentable over Trani et al., US 5,702,635. See the 102 rejection above. Not all of the limitations of all of the claims are disclosed with sufficient specificity to constitute anticipation. However, it would have been obvious at the time that the invention was made to incorporate esters as recited in claim 54, because the esters need not be acylated (col. 3, lines 62-67). It would have been obvious to use an ester which liberates undecanol, because the R groups of the esters may be of 1-18 carbons (col. 4, line 11). Use of EDTA is disclosed at col. 3, line 53. Regarding addition of ethoxylated alcohols, addition of surfactants is disclosed at col. 5, line 40, and ethoxylated coconut fatty alcohols are well known surfactants for use in laundry detergents.

Art Unit: 1751

9. Claims 50-65 are rejected under 35 U.S.C. 103(a) as being unpatentable over Vermeer, US 5,880,076. The reference discloses detergent and personal care compositions comprising glycacarbamate and glycaurea compounds (abstract). Lactic acid esters are disclosed as useful emulsifiers at col. 30, lines 34-35. No specific amount is disclosed, but determination of the emollient-effective amount of a disclosed emollient is well within the abilities of the person of ordinary skill in the surfactant art. The examiner takes the position that the disclosed R groups would make obvious the use of an 11-carbon alcohol portion of the lactate ester. A number of zinc salts are disclosed at the top of col. 38. Regarding claim 51, sequestrants are disclosed at col. 21, line 54, and aluminosilicates (zeolites) at col. 42, lines 60+. Addition of vitamin E (tocopherol) is disclosed at col. 31, line 67. Addition of 8-18 carbon alcohols is disclosed at col. 30, lines 10+. Addition of EDTA is disclosed at col. 33, line 5. Suitable surfactants are disclosed at col. 22, line 45-col. 27, line 63. This reference differs from the claimed subject matter in that it does not disclose a composition which reads on applicant's claims with sufficient specificity to constitute anticipation.

It would have been obvious at the time the invention was made to make such a composition, because this reference teaches that all of the ingredients recited by applicants are suitable for inclusion in a surfactant composition. The person of ordinary skill in the surfactant art would expect the recited compositions to have properties similar to those compositions which are exemplified, absent a showing to the contrary.

In the case where the claimed ranges overlap or lie inside ranges disclosed by the prior art, a *prima facie* case of obviousness exists. *In re Wertheim*, 541 F.2d 257,
